CEO Report

August 5, 2016

I have issued 31 Land use permits to date, the count last year was 25 to this date (Jan through July) we are ahead of last year. The plumbing permits are about the same at 19 being issued. Hopefully by the time you read this the burned building on Water Street will have been demolished and cleaned up, and the trailer that burned on the Ripley road has been cleaned up.
There is an issue with a Land Lord on Zions Hill, I'm hoping that it won't go to Court but it doesn't look good. I will keep you informed. Two properties on the big lake have sold and I have had a number of calls on what can and can't be done within the shore land zone. I have had some minor issues with unpermitted yard sales, but everyone has complied with the Ordinance. I have made a number of trips around the lake and can find no violations. As I'm finishing this the burned building on Water Street has been 90% cleaned up and in a dumpster.

Respectfully submitted,

Al Tempesta
