CEO Report

July 5, 2016

I have issued 27 building permits and 17 plumbing permits to date. The building permits are up by 10 from last year on this date, plumbing are about the same as last year. I have done lake inspections and found more people are putting buoys out in front of their camps and homes at the 100 ft and 200 ft mark trying to slow boat traffic down. I applied for and obtained a Permit by Rule (PBR) and removed a number of rocks at the beach. Mike Gudroe, his crew, and I put the buoys out at the kid's beach for the summer camp and I think it looks great. I have been working with a few property owners trying to get compliance rather than court action. With Anita gone, the days can be busy with Real Estate Agents coming in with questions and needing copies. I have been to both sides of Puffers Pond answering questions from land owners and people wanting to buy. I have received a number of complaints concerning spring street and the construction that is going on and I've passed everything on to the Utility District.

Respectfully submitted,

Al Tempesta
