

## CEO Report

April 29, 2015

Spring is here, I hope. I've done 12 building permits and 11 plumbing permits to date. I have had a couple of ongoing problems with a restaurant and bar here in Town. They didn't think that the work should be done by master plumbers and electricians. And I also had a problem with a group home on the Dover Road. They had the same kind of problems but they didn't think that they need building permits either. Both problems solved, so far. I have sent a violation notice out to a land lord on Maple street, hoping to solve that problem. I have worked with the Utility District on their project, the quicker that they can get past the Exxon the easier travel will be for everyone. I have posted a building "Unsafe for Human Habitation" on the lower main street and sent letters to the owner. In my option the house is beyond repair. Should have more news next month. If you have any questions or concerns feel free to call me.

Respectfully submitted,

Al Tempesta
