

CEO Report

March 2017

It's been slow last month mostly due to the blizzard that we had which tied things up for a week. I've issued 4 plumbing permits and while no building permits have been issued, I have been getting a lot of calls asking about permits and what is and isn't allowed. I have had a few rental complaints but they have all been taken care of. I also have had a few land lords contact me as to questions that they have. I've taken two classes on the new personal marijuana law and what could be proposed for the commercial side as laws. It seems that whatever the State passes the Towns can be more restrictive as to what the Towns want to allow. It seems through ordinances, licenses and permits the Town can be in control. But we will have to wait to see what the State proposes.

Respectfully submitted,

Al Tempesta
