CEO Report

As of this Date, I have issued 6 Plumbing Permits and 8 Building Permits. The snow has melted and trash has sprung up. I have sent a number of letters out concerning this problem and urging property owners to clean up their property. You might be surprised but this is not just a Dexter problem, it seems to be all over. The ice shack season went well with only one person not understanding the rules, but he did comply. I had a request for a private cemetery on the Bugbee Road and gave the rules to the property owner, and I have been working with a property owner on Bear Lane, he's going to build a new house. I found a number of plumbing violations and electrical violations at a business on the Corinna road, most of the plumbing violations have been taken care of, The electrical is being worked on. The rat problems that a couple of apartments had have seemed to clear themselves up and some of the tenants have moved and I guess the rats moved also.

Respectfully Submitted,

AL Tempesta
