

November Facilities Report

- **Loney and I painted the inside of the Ice Rink. We used our new paint sprayer again which save a lot of time.**
- **We had issues with our tractor. In the middle of the storm the E.G.R. light came on. I idled the tractor down and called Eric. He came up with the manual and we followed the instructions to fix it. It did what it said it would do but after it had no power and the light was still on. We ended up taking it to Greenway Equipment in Bangor. It was there for 9 days and then we were told the E.G.R. was bad and the wiring harness from the cab to the E.G.R. was bad as well.**

The school let us borrow their tractor with a snow blower and Dover Highway Dept. let us borrow their trackless with a scraper blade on it. The tractor was bigger then what we are used to but between the two machines we got the job done.

- **Robinson's came to the Town Hall and installed 8 new contact valves. Some of the old registers wouldn't open and now it is a lot warmer.**
- **We spent the rest of the time doing routine maintenance, cleaning, doing repairs and sanding picnic tables.**

**Respectfully Submitted,
Michael Gudroe**
